

Neurofeedback Technician Wanted for Growing Practice in Southern Ontario, Canada

In my neuropsychology and sport psychology practice (NiagaraNeuropsychology.com & FriesenPerformance.com) we are looking to hire a part-time (to start) EEG/Neurofeedback technician with a keen interest in the brain and working with clinical and peak performance populations. We are not looking for summer students or students looking for a short-term experience. The person we are looking for would carry out 19-channel qEEG assessments and provide neurofeedback under my supervision. We work with a combination of clinical populations (TBI, anxiety, depression, addictions, etc.) and high performers (e.g., elite athletes).

The position starts in August or September 2017 (but training can start earlier). We can only provide part-time work to start but as the practice expands, we will move it to full-time if possible.

Pay will be per client hour (\$30 CAD/session which is ~ 1 hour).

Below are more details:

- 1) Needs to have NFB or EEG or ERP tech experience.
- 2) We do not want someone looking for only brief employment or short-term work.
- 3) We want someone who loves neuroscience, neuropsychology and working with clinical populations.
- 4) They will be trained by my current tech and myself (if needed).
- 5) They need to be relatively flexible in their hours.
- 6) Preference will be given to those applicants who are BCIA certified or who would be willing to complete certification within 6 months.

If you would be so kind to share this information with anyone who may be interested, I would be very appreciative.

Please have them contact me directly at the email address or phone number below.

Thanks for your time,

Dr. Chris Friesen, Ph.D., C.Psych., BCN
Practice in Clinical, Forensic/Correctional, & Neuropsychology
Board Certified in Neurofeedback (EEG Biofeedback BCIA-BCN)
