

Neurofeedback Clinician

The Neurovation Center - Sandy Hook, CT

The Neurovation Center is a rapidly growing, state-of-the-art outpatient mental health treatment center that merges neurofeedback and psychotherapy modalities. TNC is one of the Northeast's leader in providing neurofeedback and neuroanalysis services. We are looking for a highly motivated, person-centered individual to train as a neurofeedback clinician. This is a rare and exceptional opportunity to launch your career into the emerging, paradigm-changing field of neurofeedback-based mental health.

The position of Neurofeedback Clinician is a Full Time position held by a licensed mental health provider (LCSW, LPC, or LMFT) who is also BCIA certified in neurofeedback (BCN). If not BCIA certified at the time of hire, applicants must be willing to become certified within 6 months of hire. The Neurofeedback Clinician's role is to provide clinical direction and supervision of neurofeedback treatment at The Neurovation Center (TNC). The position will be responsible to assess patient symptoms and treatment needs, create treatment plans and review patient progress, and manage overall treatment using an integrated neurofeedback / psychotherapy modality. Key areas of expertise for this position are Assessment, Diagnosis and Review skills; Ability to work with computers and technology; Excellent people skills; and Therapeutic Counseling. The position reports to the Owner, Jeff Schutz, and works closely alongside the Clinical Director of Neurofeedback Training.

Training: A mental health license is a necessary pre-requisite for this position, along with prior experience in Assessment, Diagnosis, Treatment Planning and Case Management. Prior experience with neurofeedback is preferred but not necessary. Applicants with no prior experience must have familiarity with neurofeedback processes, and the nature of neurofeedback treatment should be clear. A BCN is not required, but acquisition of neurofeedback certification is required within 6 months of the date of hire. Training is both on-site and via BCIA-certified courses. Non-BCN applicants will be considered NFB Clinician Trainees until certification is completed, functioning under the oversight of a BCN. The position is also required to engage in professional development of neurofeedback skills and knowledge base on a regular basis, consistent with the nature of rapid change and expansion occurring in the field.

Details: The Neurofeedback Clinician functions as a critical part of TNC's mental health treatment Team. In addition to working effectively with the Team, this person is hired and must be competent to:

- Develop and maintain technical neurofeedback training skills, including patient preparation, signal acquisition, protocol monitoring, file record-keeping and clean-up regimens. The NFB Clinician must be able to run NFB training and QEEG acquisition sessions proficiently, as needed, at the level of a Technician.
- Develop and maintain a high degree of expertise in the use of all TNC NFB acquisition, training and assessment software, in particular Brainmaster and Neuroguide products.
- Read, evaluate and interpret QEEGs. Consult with TNC's QEEG analysts and other senior NFB Clinicians, review data with patients, and present treatment recommendations.
- Conduct Assessments, Diagnostic Interviews and Progress Reviews that result in symptom differentiation and the formulation and/or adaptation of personalized Treatment Plans.
- Provide effective case management for assigned patients' overall treatment planning.
- In consultation with other Clinicians, make recommendations on treatment modalities and/or referrals.
- Provide psychotherapeutic treatment sessions as part of an overarching treatment plan and consistent with personal modality expertise, as determined by the Clinical Team.
- Supervise NFB treatments and Tech activities while working as the NFB Clinician "on deck."
- Complete and maintain all EHRs, files, records in a timely and accurate manner, consistent with TNC processes and standards.
- Be available, as necessary, to provide administrative support for TNC file maintenance, promotional, phone call, and scheduling needs.

- Engage in efforts to maintain TNC's facility at a high level of cleanliness. Clinicians should engage in or delegate cleaning tasks, both those considered routine (eg, dusting, vacuuming, emptying waste baskets) and "in the moment" (eg, food spills from a patient; backed up toilet; some other "accident" of messiness).

Note: Starting pay is \$30 per hour with salary options available after completion of certification. Benefits are available, including health insurance, IRA savings with matching contributions, and a fantastic work environment!

Job Type: Full-time

Education:

- Master's

License:

- LMFT, LPC, or LCSW
