

Novah Healthcare is an innovative, quality driven health care provider of individualized acute and chronic treatment programs for the physical, cognitive and emotional needs of our patients. We specialize in the treatment of musculoskeletal injuries, chronic pain and emotional trauma. Our integrative approach combines scientific evidence with extensive clinical experience and shared expertise.

We have a proven track record of improving physical/psychological symptoms and optimizing functioning at home and at work. The majority of our patients have also been able to significantly reduce or eliminate their medications (including opioids, neuropathic medications and mood stabilizers).

We are currently seeking a Certified Biofeedback Therapist to join our team. The successful candidate should be experienced in using EMG biofeedback. Preference will be given to those who are BCIA certified or who are willing to complete certification within 6 months.

Biofeedback therapy is particularly crucial in integrating the psychological and physical aspects of our treatment programs.

We are located within a busy medical building beside Trillium Health Mississauga Hospital on the Queensway, Mississauga, Ontario, Canada.
